About Me

I am a motivated and creative **Full-Stack Developer** with a strong foundation in both frontend and backend technologies. Passionate about building modern, responsive web applications using React, Node.js, and Flask. Eager to contribute clean, scalable code and bring real-world impact to tech-forward teams. Strong interest in user experience, software engineering best practices, and solving meaningful problems through code. I am a stout Christian and **founder of The Power Of Compassion Foundation** inviting you to join me in restoring hope and transforming lives through the gift of giving.

Professional Experience

Freelance Full-Stack software Engineer & Developer.
2025 – Present

Key responsibilities:

- Personal Portfolio Website — Designed and developed a fully responsive personal portfolio using React and Flask. Integrated scroll-based animations, form backend, and a mobile-friendly layout to showcase skills and contact options.
- Talex Suppliers LTD Website — Built a full business website for a car accessories supplier. Implemented interactive product views, contact functionality, responsive UI, and modern branding using React, CSS and custom effects.
- Power of Compassion Foundation — Developed an informational and contact-driven platform for a nonprofit organization. Focused on accessibility, clear navigation, and responsiveness across devices by use of React, CSS and custom effects.
